Group of Artificial Intelligence in Agriculture (G.A.I.A.)

Texas A&M AgriLife Research | Department of Soil and Crop Sciences

WHAT WE DO

ANALYTICS
Data Science | AI | Statistics

COLLABORATION
Grants | Projects | Education

CONNECTION
TAMIDS | Experts | Infrastructure

PROJECT INVOLVED

- Explainable AI Modeling
- Flux Time Series Analysis
- Herbicide & Weather Modeling
- Wheat & Small Grains AI
- Corn Senescence Modeling
- Spectral Soil Analysis
- Cotton Yield & Quality Prediction
- Purdue Data Mine
- Turfgrass Moisture Modeling
- Corpus Christi Digital Ag Program

OUR PEOPLE

Dr. Thanos Gentimis
Assistant Professor
Data Science, AI, Mathematics Statistics

Dr. MD Nafiul Islam
Postdoctoral Research Associate
AI, Data analytics, Computer Vision

Ritik Pokharel
Ph.D. Student
Agronomy, Data Science, Remote Sensing, GIS, AI

Rejina Adhikari
Ph.D. Student
Agronomy, GIS, Remote Sensing, AI

Varenya Sri Mudumba
Masters Student
AI/Machine Learning, Software Development, Cyber-Security

Chloe Tilley
Undergraduate Student
Image-based Phenotyping, Predictive Modeling

EDUCATION

- Digital Ag Class
  - ✓ R & Python programming
  - ✓ Machine learning & neural networks
  - ✓ GIS & spatial data analysis
  - ✓ Time-series modeling & remote sensing
  - ✓ Applied digital agriculture projects
- R Workshop for Data Analysis
  - ✓ RStudio setup & data import
  - ✓ Statistical analysis (t-test, ANOVA)
  - ✓ Data visualization in R
  - ✓ Basic data analysis workflows

PUBLICATION

- UAV Biomass Prediction – Drones (2025)
- Nitrogen Rate in Maize – Agronomy (2025)
- Digital Ag Workforce – CEA (2024)
- Soybean Yield ML – SAT (2024)

Full publication
